RECENT EXPERIENCE

GOOGLE   OCT 2024 – PRESENT

UX Designer, Design Systems

- Supporting Google Wallet migration from Material 3 to 3 Expressive, increasing system flexibility and adaptability for future growth.

- Developed and maintained Figma libraries and documentation, improving productivity for new designers and engineers.

PLUTO TV   AUG 2023 – SEP 2024

Senior Design Systems Designer

- Improved the Nitro Design System component library, resulting in a 30% reduction in redundant design efforts and faster feature rollouts.

- Rolled out a design token framework, enabling seamless handoff and collaboration between design and cross-platform engineering teams.

- Conducted interactive design token workshops for designers, engineers, and stakeholders to facilitate comprehension and practical application of design tokens in projects.

CISCO   MAY 2023 – SEP 2023

Senior Product Designer, Design Systems

- Delivered comprehensive component sets and documentation for the Magnetic Design System, enabling rapid prototyping and experimentation.

CITY NATIONAL BANK   NOV 2022 – MAR 2023

Senior User Interface Designer, Design Systems

-Led accessibility enhancements and color system updates, ensuring compliance and inclusivity.

-Conducted research on internal products to identify ways to enhance designer and engineer efficiency through the design system.

FIRST AMERICAN   MAR 2021 – NOV 2022

Senior Design Technologist

-Designed and developed system artifacts including Figma and (Angular) front-end production code, documentation, and Storybook to boost designer and engineer productivity in developing the Ignite application.

-Introduced a new color system with expanded hue variations for flexible pairings that align with WCAG 2.1 AA accessibility contrast standards.

-Implemented a design token system to enhance support for the component library and applications.

-Adopted methodologies for automating front-end component packaging to improve efficiency.

BOULEVARD   SEP 2019 – FEB 2021

Senior User Interface Developer

-Founded BLVD UI design system, the first incarnation of Boulevard's design system.

-Introduced design tokens and best practices, empowering teams to deliver high-quality, consistent user experiences.
